I hope this message finds you well. My name is Marcelo Naveira, and I serve as the Medical Officer for Viral Hepatitis at the WHO Regional Office for Europe.

I would love the opportunity to connect with focal points and officers working on viral hepatitis and related health information systems in Estonia.

Given Estonia's impressive advancements in health digitalization, your country's experience could provide valuable insights for other Member States in designing and implementing clinical and epidemiological data systems.

I would greatly appreciate your guidance on the best way to engage with the relevant colleagues. Looking forward to your thoughts and hoping to collaborate.

Best regards,  
Marcelo Naveira
