(Rules and regulations are in Appendix).

Competitions are held in a combative double (double-event):

1st Section - “Shooting” (with a pneumatic rifle from a distance of 10 m. to the target);

Second Section - All-Styles Fighting (in different versions: from light to full-contact versions, and two contactless versions: “Self Defense” and “Kata”).

In these competitions, different organizations and sportsmen could participate: cadets of military schools, professional military, police officers, secure service staff, etc. (to check the level of their preparation) and any Sports organization (for improving their fighting skills).

Detailed proposition, in what section to participate, for the different National Martial Art Organizations is in attached file.

In addition, an interested Sports organization can obtain a license for the development of this kind of sport in Estonia.
