The technical drawing illustrates a power distribution system for a residential area. It features several key elements:

- Cable Routes:** Indicated by solid black lines with arrows showing direction. A prominent route runs horizontally across the top, branching downwards towards various points.
- Elevations:** Numerous numerical values are scattered throughout the drawing, representing ground or proposed elevations in meters above sea level (e.g., 60.80, 59.77, 60.03, 59.92, 60.46).
- Infrastructure:** Includes a blue circular manhole cover labeled "WC" at elevation 60.13, and a rectangular structure labeled "KAUPLUS" (cabinet) at elevation 60.46.
- Annotations and Notes:** Several red-bordered boxes contain critical instructions:
 - "Ristumisel teede, puude ja kraaviga paigaldada kaablid kinnisel meetodil teede all 1,5 m sügavusele ja kraavi põhjast 1 m sügavusele. Vt IP7023-K2_TP_EL_4-02 leht 1."
 - "Ettevaatust! Ristumine MTÜ EASV sidetrassiga. Täpne sügavus täpsustada enne kaevetööde algust. Orienteeruv sügavus 1,2 m."
 - "Ettevaatust! Ristumine ELA SA sidetrassiga. Täpne sügavus täpsustada enne kaevetööde algust."
 - "M11 tugi demonteerida."
- Project Details:** Located in the bottom right corner, it includes:
