LETTER OF EXPERIENCE

e-Invoicing Partnership with Billberry

I can confirm that Centre of Registers and Information Systems (CRIS), the IT development centre of the Estonian Ministry of Justice and Digital Affairs, has a cooperation agreement with Billberry since 2021, which's purpose is to enable the transmission and reception of e-invoices between CRIS e-Financial platform and Billberry's e-invoice software. e-Financials is a web-based accounting software used by over 30,000 businesses and organisations in Estonia. It serves as both a bookkeeping tool for small businesses and non-profits as well as an e-invoice operator for its accounting software provider clients.

In 2025, CRIS concluded a procurement contract with Billberry to incorporate their Peppol forwarding service into e-Financials platform. This allows our users to send and receive e-invoices across the Peppol network through Billberry's infrastructure, giving us a straightforward path to cross-border e-invoicing.

Over the years, Billberry has been a reliable and technically capable partner. They are easy to work with and responsive when it comes to technical coordination.

Kind regards,

Aleksandr Belousov
